CCG SPECIALIZES IN BEHAVIORAL HEALTH CONSTRUCTION

We are a leading general contractor with over 20 years of proven excellence in ground-up construction, renovations, and retrofits nationwide.

From first walkthrough to final punch list, CCG follows a proven process built for behavioral health:

Assessment
We evaluate your existing facility, identify code and safety gaps, and align on project goals.

Design Coordination
We collaborate with your architects, healthcare consultants, and licensing teams to ensure every detail meets behavioral health standards.

Phased Construction
We build in stages to keep your facility operational, protecting your census and minimizing disruption to patients and staff.

Turnover & Support
We deliver a move-in-ready space, walk your team through every system, and stay responsive through closeout and beyond.

For renovations or new builds, CCG builds secure, therapeutic spaces that promote healing and operational excellence.

We create healing environments that balance safety, functionality and calming aesthetics to support patient recovery and staff efficiency.

Our expertise ensures safety and comfort coexist through anti-ligature, tamper-resistant and durable materials — all in full compliance with Joint Commission, CMS, NFPA, ADA and state licensing standards.

We deliver a full range of behavioral health facilities including:

- Inpatient and outpatient behavioral health units
- Crisis stabilization and detox centers
- Adolescent and adult treatment programs
- Secure patient rooms and observation areas
- Staff and administrative spaces

> “CCG has performed renovation services to our facilities across several states, including Indiana, Arkansas, and Arizona. Their work is professional, aesthetically pleasing, and quality craftsmanship.

FEATURED PROJECT

THE HAVEN DETOX - OKLAHOMA

Location:	Tulsa, Oklahoma	**Site Area:**	1.70 Acres
Client:	Haven Health Management	**Stories:**	2
Project Type:	Adaptive Reuse	**Rooms:**	90
Role:	General Contractor	**Beds:**	116
Building Size:	55,972 SF	**Completion:**	2025

CHALLENGES

The existing structure presented significant challenges including extensive water damage from failed windows and siding, deteriorated Masonite exterior cladding, and aging mechanical systems. CCG's team developed a phased renovation approach that addressed critical envelope repairs first to prevent further damage, followed by systematic interior fit-out. The project required close coordination with architects and healthcare consultants to ensure all behavioral health safety requirements were met, including specialized anti-ligature hardware throughout patient areas.

RESULTS

The completed facility provides Haven Health Management with a modern, code-compliant treatment center serving the Tulsa community. The renovation transformed an outdated nursing home into a purpose-built behavioral health facility featuring 90 patient rooms, comprehensive treatment amenities, and state-of-the-art safety features.
